Education

Irvine Valley College — Irvine, CA

Computer Science - CGPA: 4.0 — *Expected May 2026*

- Relevant Coursework: Advanced programming in C++, Discrete Math, Data Structures and Algorithms, Calculus I and II, Assembly Language, Programming in C, Databases
- Activities: Girls Who Code College Loop, Computer Science Club, Chess Club, Staff Editor, Volunteer Website Developer

Experience

Frontend Developer — Aug. 2025 – Present

Saddleback CodeBase Organization — *Mission Viejo, CA*

- Collaborate in interdisciplinary teams to design and develop web-based projects for clients and non-profit organizations.
- Worked on the React frontend of a client project, setting up the UI and integrating it with the backend.
- Managed project dependencies with npm, created responsive components, and ensured smooth interaction with backend endpoints.

Peer Mentor and Executive Officer — Sep. 2024 – Present

Girls Who Code College Loops and Mentoring Corps — *Irvine, CA*

- Serve on the executive board to support the mission of empowering women in technology.
- Mentor high school students in coding concepts and problem-solving.
- Plan and lead initiatives that provide mentorship, hands-on coding experience, and networking opportunities for college students pursuing computer science and related fields.

Staff Editor — Sep. 2024 – Present

The Ear Literary Journal — *Irvine, CA*

- Serve as a staff editor, responsible for reviewing and editing submissions.
- Assist in managing and maintaining the official website and its technical infrastructure.
- Organizing events, and handling its associated podcast: The Eardrum.

Beta Tester — Aug. 2025 – December 2025

Laith Inc. — *Remote; Chicago, IL*

- Project lead for Laith Inc.'s inaugural beta testing cohort, providing feedback on new features, identifying bugs, and helping improve product performance and user experience before public release.
- Leading the team to plan and execute a community meetup, managing stand-ups, task tracking, and Trello/Notion boards. Responsible for coordinating team roles, organizing workflows across multiple time zones.

Projects

CampusCollegeTour | *C++, HTML/CSS, SQLite, QT* — Jan. 2026 – March 2026

- Class project built with QT using C++ and HTML to build both logic and GUI.
- Responsive application that worked as a tour guide with stops and purchasing souvenirs using data structures.

IVConnect | *HTML/CSS, JavaScript, Git* — April 2025

- Built a responsive web interface which serves as an interactive platform designed to improve student and club networking at IVC for their first ever Hackathon.
